

CWAP-403 and CWDP-303 Exams Available October 1st

DURHAM, NC (September 5, 2018) – CWNP is proud to announce the release of the Certified Wireless Analysis Professional-403 (CWAP-403) and Certified Wireless Design Professional-303 (CWDP-303) exams and study materials October 1, 2018. These are the newest updates to the certifications which come out on a three-year cycle to keep up with changing industry expectations and technologies.

CWAP-403 focuses on the analysis of wireless networks. Someone certified with CWDP-303 will have the ability to properly design a wireless network. These certifications' knowledge bases were dictated by a Job Task Analysis (JTA) conducted in March of 2018.

“We spoke to the people considered experts doing the work now to create a job description. It’s important to note that CWNP had no say on what these experts said must be included in the objectives, we just facilitated the conversation and took notes” said Tom Carpenter, CWNP CTO.

As part of these major changes, we’ve realigned the exam objectives to reflect changes in technology and new industry-standard job responsibilities.

“The JTA is the first step in the process for us,” said Sean Stallings, CWNP President, “In the coming years, all CWNP certifications will be ANSI Accredited.”

Interested parties may purchase the materials and exam prior to the official release as a part of a limited-time promotional pre-sale running until the official release date. Those who purchase will receive their products on the first of October when the eLearning, practice tests, study guide, and exam vouchers reach virtual shelves.

eLearning, exam vouchers, practice tests, and study guides for self-paced learning [available immediately](#). [Onsite trainings](#) available at select locations. The first official training sessions will be held at [Wi-Fi Trek 2018, October 13-17 in San Diego, California](#).

Individuals with the current exam voucher and materials have until November 30, 2018, to take the exam. If their voucher does not expire until after the transition, they have the ability to upgrade their exam to the newest version of the exam free of charge. Study materials will not be upgraded.
